WEATHER OF CONCERN

Northern California

- Snow totals through tonight will be 2-8 inches, with some locally higher amounts.
 - Minor mountain travel delays from snow
- As temperatures cool below freezing this evening, patchy ice may form on some stretches of roadway. This will create variable, and potentially hazardous, driving conditions with transitions from dry to icy pavement for portions of Plumas, Sierra, Lassen and Modoc Counties.
- There is a chance for another weather system to move into the region late Sunday - Monday that has the potential to produce significant precipitation amounts, but confidence is still low on the strength of this system.

Southern California

- Widespread rain and mountain snow will move across southern California off and on through [early Thursday night](#). Moderate with localized heavy precipitation at times can be expected Thursday. Mountain snow will also fall above 6,000-7,000 feet in Southern California, with several inches of snow possible above [6,000](#) feet. Rainfall rates are still expected to remain below critical values; however, this will continue to be monitored as the storm system continues through Thursday [night](#).
- [Winter Weather Advisories for the San Bernardino County mountains above 6,500 feet until Thursday night.](#)

WEATHER SYNOPSIS BY REGION

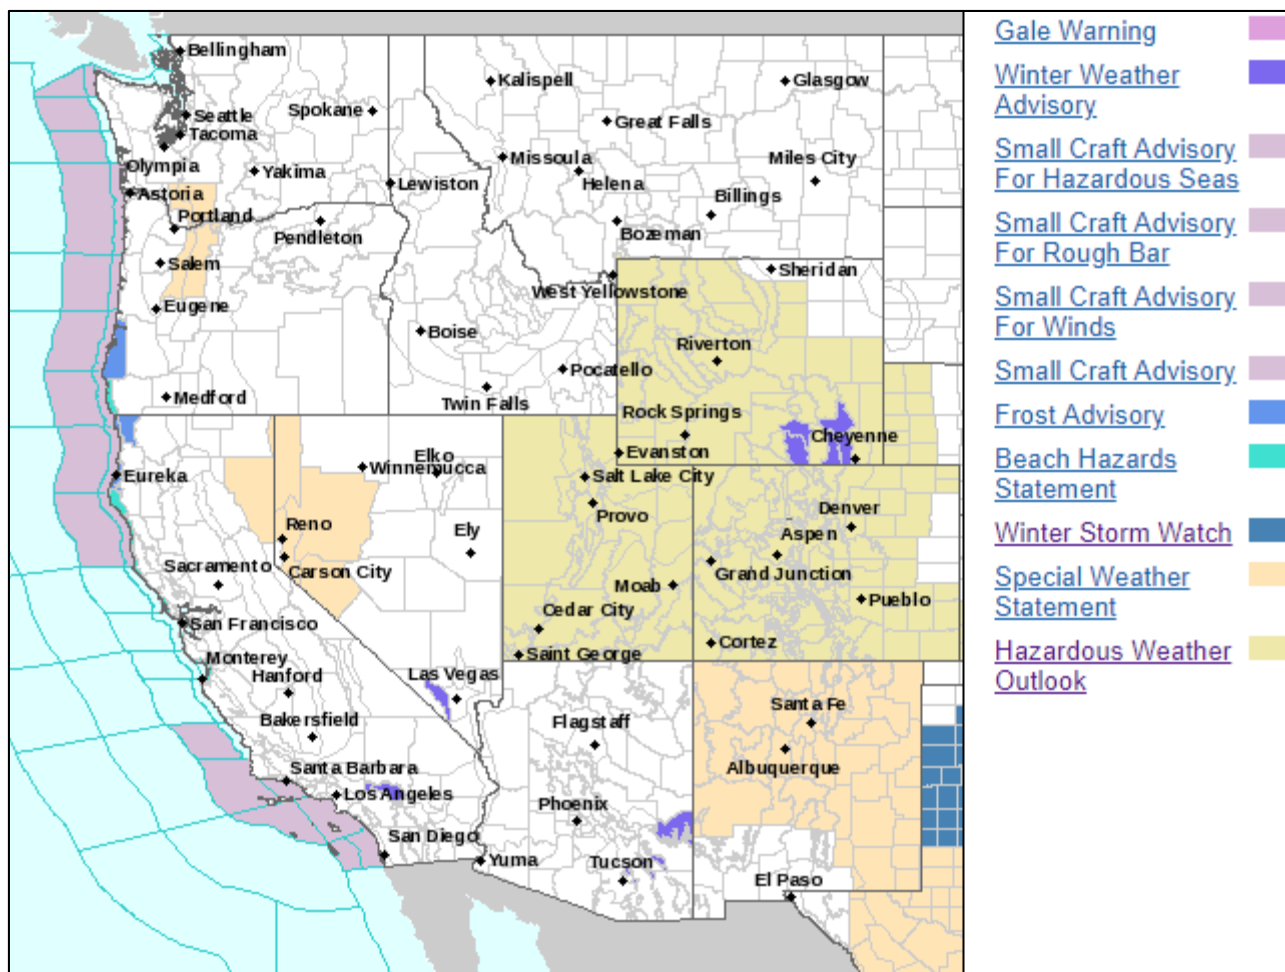

NORTHERN CALIFORNIA

- An unsettled weather pattern will continue over the region into next week.
- One weather system off shore will arrive/pass today with relatively light precipitation across the Geographic Area.
- Thursday through Saturday night are expected to be rather dry under a passing high pressure ridge with another, moderately wet weather system arriving for later Sunday into Monday.
- The lowest snow levels now appear likely to be 3,500-4,000 feet over the next 7 days.
- Some gusty N to E winds will be in place early this morning, mainly along and west of the Coast Range crest. Gusts of 25-35 mph are expected, locally to around 40 mph possible. Lighter winds will follow for a few days before picking up again quite a bit this weekend.
- Temperatures will be close to seasonal normals in all areas with the warmest locations generally near 60 for highs and mid 40s for lows.

SOUTHERN CALIFORNIA

- A low pressure area will hug the Central California coast today before dropping south Thursday. This low pressure area will move inland over Northern Baja Friday morning. A weak ridge of high pressure will build into the region Friday through this weekend. A Pacific trough will drop down the West Coast early next week.
- Showers will spread across the rest of Central California this evening. Showers will develop across Southern California this morning. Showers will end across the region from north to south throughout the day Thursday.
- Most locations will receive between 0.50 and 2 inches of rainfall through Thursday.
- The snow level will be around 6,000 feet.
- Temperatures will cool to the mid 30s to mid 40s across the mountains and 50s to low 60s in the valleys today and Thursday.
- A slow warming and drying trend will occur Friday through this weekend.
- Showers with light to moderate rainfall totals will spread from north to south early next week and temperatures will drop to 5 to 10 degrees below normal early next week.
